DETAILED ACTION

1. Claims 1-21, remained pending.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/30/2007 has been entered.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-21, are rejected under 35 U.S.C. 103(a) as being unpatentable over 7177, 833 Marynowski et al(Hereinafter Marynowskt U.S Patent 7, 177, 833).

As per claims 1-11, Marynowski discloses a computer system for exchanging a financial note for a quantity of an exchange traded item comprising: (see column 4 lines 64-67 and column 5 lines 1-24).

Marynowski fail to explicitly teach calculating unit for calculating an exchange ratio of a level of a benchmark index relative to a price of an exchange traded item, and a transaction unit for delivering a quantity of the exchange traded item to the investor in exchange for the financial note in accordance with the calculated exchange ratio.

However it would have been obvious to one of ordinary skill in the art that an investor can contact a broker to purchase a note or notes and the broker in return can use a calculator in order to calculate an exchange ratio of a level of a benchmark index relative to a price of an exchange traded item, delivering or providing a quantity of the exchange traded item to the investor in exchange for the financial note in accordance with the calculated exchange ratio.

Art Unit: 3692

Further this is an automation of a known system.
